WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Cut 57 long; ends square to 0.5; deburr inside and out.
Bore 17.3 passes the M16 bolt; 21.3 outside slides
into the 21.5 hole in the back wall of the post.
Fits: one end bears on the inside of the canal-side wall;
the other is flush with the back face, under the 50 mm
washer. It stops the bolt crushing the post walls.
Check: push it in; it must stop on the far wall with its
end flush (within 0.5) with the back face.
