**RIGHT VIEW**

Scale 1:2; looking at the right side (along -X)

**WHERE IT GOES**

This part in colour, its neighbours in grey

**HOW TO MAKE IT AND HOW IT FITS**

Cut 360 long, ends square; deburr inside and out.

Rope holes: 16 dia right across the tube, 20 in from each end; drill through both walls on one line (use a V-block and a drill press; pilot 6 first).

Rungs 3, 6, 9 and 12 only: two 5.3 holes across the tube, 40 in from each end, on the same line as the rope holes.

Round every hole edge with a deburring tool so no sharp edge is left for the bush or the rope.

Check: a 16 rod passes straight through both holes.
