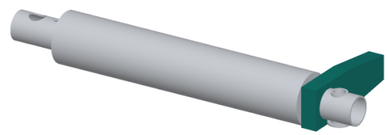
Scale 1:2; looking at the right side (along -X)



WHERE IT GOES

This part in colour, its neighbours in grey

HOW TO MAKE IT AND HOW IT FITS

Mark the outline from this sketch: 115 long, 40 tall at the rung end, tapering to a 24 tall nose over the last 60.

Saw and file; round the nose corners 4 so it slides on concrete.

28.8 hole for the rung, centre 20 from the back end and on the height centre line (step drill or hole saw).

5.3 hole straight down through the middle of the 16 thickness, crossing the rung hole.

Fits: on the rung just inside the bush, nose toward the wall, held by one M5 x 50 bolt through block and rung.
